

MINES AND MARKETS

MARKET STRONG AND TENDENCY WAS UPWARD

PROFESSIONAL ELEMENT FURNISHED PRINCIPAL VOLUME OF BUSINESS.

SMALL REVISION HOPED FOR

Taft's INAUGURAL ADDRESS IS MADE BASIS FOR MUCH BETTER FEELING.

NEW YORK, February 27.—The professional contingent was active today during the short session of the stock exchange, which ended the short week, and their opening showed great variety and irregularity. The strong upward impetus during the first hour carried prices to the highest level since the demoralized break at the opening of the week.

The earlier strength was a reflection to some extent from the foreign markets, where the brightening prospect of a settlement between Austria and Serbia is hailed with welcome relief.

Operators who professed to have read Taft's inaugural address express satisfaction at its tenor, and belief that business confidence would be fostered by its contents. There were in circulation well defined reports that prospects were shaping to moderation in the revision of the tariff and the force of events in the steel trade might be expected to have their influence in that direction.

The small net changes at the end of the day, in spite of a considerable volume of transactions, offer strong presumptive evidence of sales on account

among professional traders on the floor of the exchange as the principle source of activity.

METALS DULL.
NEW YORK, February 27.—The metal markets were nominally unchanged in the absence of cables. Tin was dull at 28.40 to 28.70. Copper quiet. Bonnie Lassie Comes All the Way From Old Cornwall

John Williams and Miss Katie Sampson were married last night by Rev. E. G. Decker of the Methodist church at the home of the groom's brother, G. H. Williams, on Bailey hill. The official witnesses were George H. Williams, the groom's brother, and R. H. Allan. Others who were present at the ceremony and partook of the supper afterwards were, William Ross, Mr. and Mrs. Robert Allan, R. Vinton, Mr. and Mrs. G. H. Williams and Master G. H. Williams.

The groom is a sturdy young blacksmith in the employ of the Old Dominion company, with a host of friends in the community. The bride, who arrived in Globe Thursday evening, comes from Penzance, Cornwall, England. She is a pretty young woman of charming manner, and last night she was as bonnie a bride in her blue dress as one could well wish to see. She left her home in the Old Dart two weeks ago and had a stormy passage across the ocean, but she found a pretty home waiting for her on North Hill street, for Williams had improved every hour of the time by planting flowers and shrubs and otherwise beautifying the nest he has built for her.

GOOD ORE IN RYE

THIRTY-FIVE FOOT VEIN PENETRATED IN DRIVING OF TUNNEL.

Late news from the property of the Rye Copper company in Tonto basin is highly favorable, and encourages the belief that with adequate development it will be come a mine of great size and value. E. F. Eisenhour received word from the mine by telephone on Friday that the tunnel had penetrated about thirty-five feet of high grade ore, the character of which had changed to a considerable extent from red oxide and carbonate to sulphide, and water was increasing. The whole face of the drift was in good ore. The tunnel is in about 205 feet and has attained a vertical depth on the vein of 200 feet. A prospect was started yesterday and it is confidently expected that the ore body will be found to be quite wide, as indicated near the service. The crosscut will be driven to the footwall, which is fully 250 feet from the tunnel. Mr. Eisenhour will leave for the mine in a few days.

What Makes a Graceful Woman

It is poise, suppleness, conscious power—and absolute freedom of movement.

It would be hard indeed for a woman to be ungraceful in a Gossard Corset. At every point, in every way, it contributes to ease and grace.

To begin with, it gently forces a woman to stand correctly. It gives her a new straightness of shoulder. It rests the back perfectly, supports the arch of the spine—thus emphasizing woman's truest beauty line.

If a woman is inclined to be stout, it supports and properly reduces the superfluous flesh.

It holds up the bust—gives perfect freedom to the lungs. It induces that long, curving, girlish hip effect so much desired.
